

# BIJOU™

bathroom & kitchen collection

care & cleaning  
guide

## GETTING STARTED

To ensure the absolute best results when caring for your BIJOU products, please follow the instructions in the guide carefully. All of our products are stain resistant, allowing for simple care and maintenance.

Do not use any chemicals, as these may damage or discolor your product and could potentially affect the functionality. Any product will be damaged by aggressive chemicals such as trichloroethane or methylene chloride as found in paint stripper. Do not use highly abrasive sponges or cleaning products containing scouring

Use only a soft, dampened cloth with warm water. Please also note; factors such as the hardness and temperature of water, may affect the finish of your product.

Enjoy luxury made simple.

NO CHEMICALS

ONLY WARM WATER  
IS PREFERABLE

NO HARD SPONGES

SOFT CLOTH IS  
PREFERABLE

## ALL FINISHES & HOW TO TAKE CARE OF THEM

- Never use abrasive or coarse surface materials to clean.
- Do not use any aggressive cleaning agents containing ingredients such as chlorine bleach, formic acid, acetic or hydrochloric acid to clean your faucet. Only warm water is preferred.
- By drying the surface with a soft cloth after rinsing, reduces water deposits.
- Ensure to clean your stainless steel faucet at least once a week. If you live on the coast, at least every 2 days.
- Lime-scale deposits may be more visible on the graphite & powder coated finishes around the aerator housing and the dome cover.
- If ever chloride containing cleaners are used (not recommended), ensure you rinse the surface immediately to prevent corrosion.
